**Fig. 6.** Inability of *L. major* expressing GM-CSF to promote infection into BALB/c susceptible mice.  $2 \times 10^7$  *Leishmania* promastigotes expressing GM-CSF and also wild-type were injected into footpad of 8 mice per group. Infection was monitored by measuring the footpad lesion with a metric caliper over 6 weeks.  
 □ *L. major* m-GM-CSF, Δ *L. major* pSPYneoss
